Enhancing our clients' Business Continuity and Operational Resilience

Founded in 2021 by experienced practitioners, ADVOX Business Resilience is a client-focused consulting and training firm. We help organisations prevent, respond to, recover and learn from operational disruption, drawing on 25+ years of collective experience across banking, financial services, asset management, logistics, technology and security in the UAE, the wider GCC and the UK.

THE ADVOX APPROACH

Practical and proportionate

Robust arrangements that stay simple, manageable and intuitive.

People-centred

Plans in clear, accessible English, so staff know exactly what to do.

Aligned with standards

ISO 22301 where helpful, and always local regulation, including central banks.

Full-lifecycle support

From first gap analysis to embedding, certification and ongoing maintenance.

FROM RISK TO RECOVERY

Key components of an ADVOX BCMS

From first gap analysis to ISO 22301 certification. As qualified ISO 22301 Lead Auditors, we know an effective BCMS from both sides of the audit table.

1. **Governance and scope**
   Policy, scope, owners and a steering group that meet ISO 22301 and your regulator.
2. **Business impact analysis**
   What matters most, how long it can stop, and what it relies on.
3. **Risk and dependency review**
   Realistic regional threats and single points of failure.
4. **Recovery strategies**
   Alternate sites, remote working, workarounds and standby suppliers.
5. **Plans people can use**
   Short, clear plans: when to activate, the first hour, who does what.
6. **Crisis and incident management**
   Escalation, decisions and communications joined up.
7. **Training and BCI certification**
   Role-based awareness and BCI courses for leaders and teams.
8. **Exercises, review and assurance**
   Tabletops to full simulations, lessons learned and audit readiness.
